PROFILE

First-class Computer Science graduate with hands-on experience building secure, database-backed applications using React, TypeScript, Node.js, Java/Spring Boot, Python, and MySQL. Experienced in REST APIs, authentication, data workflows, responsive interfaces, testing foundations, and Docker-based development. Seeking junior software engineering, backend, full-stack, data, or graduate opportunities.

EDUCATION

University of Derby, UK - BSc (Hons) Computer Science, First Class Honours

Delivered through Mediterranean College, Athens | 2023-2026 | Awarded July 2026

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Java, Python, SQL, C/C++, PHP

Frontend: React, Vite, React Router, TanStack Query, Axios, HTML, CSS

Backend: Node.js, Express, Spring Boot, FastAPI, REST APIs, JWT

Data & Tools: MySQL, JPA, Flyway, Docker Compose, Git, GitHub, Postman, Linux, Maven

Testing: JUnit 5, Mockito, Vitest, React Testing Library

SELECTED PROJECTS

Restaurant Operations Platform | In Development - *React, TypeScript, Java 21, Spring Boot, MySQL, Docker*

- Building a secure restaurant operations platform with JWT authentication, protected routing, table management, reservation workflows, validation, filtering, and responsive administration screens.
- Implemented rotating refresh tokens, Spring Security, Flyway migrations, optimistic locking, audit events, OpenAPI documentation, and frontend/backend test foundations.

CoS-BA Bias Auditor | Completed - Final-Year Project (86%) - *React, Node.js, Express, MySQL, JWT, Recharts*

- Developed a full-stack platform for uploading AI-generated content, reporting bias, reviewing community submissions, and managing moderation workflows.
- Added authentication, file uploads, search and filters, likes/comments, report-status tracking, admin controls, and analytical dashboards.

Attendance Management System v2 | Completed - *React, Node.js, Express, MySQL, JWT*

- Built an admin-focused system for student and session management, attendance marking, reporting, dashboard analytics, filtering, pagination, and student profiles.
- Implemented REST API integration, MySQL-backed workflows, authentication, bulk Excel import/export, attendance statistics, and report exports.

TraceAI | In Development - *TypeScript, Express, Python, FastAPI, MySQL, Docker Compose*

- Designing a human-in-the-loop platform for claim-level verification of AI-generated answers against uploaded evidence; established the API, AI-service, database, authentication, and health-check foundations.
