

ADAM WALEED HATEM AHMED HOSSAMELDEN

Athens, Greece | [+30 694 398 9888](tel:+306943989888) | adamwaleedhossamelden@hotmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

EDUCATION

University of Derby, UK - BSc (Hons) Computer Science, First Class Honours 2023-2026
Delivered through Mediterranean College, Athens | Awarded July 2026

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Java, Python, SQL, C/C++, PHP
Frontend: React, Vite, React Router, TanStack Query, Axios, HTML, CSS
Backend & APIs: Spring Boot, Spring Security, Node.js, Express, FastAPI, REST APIs, JWT, WebSockets/STOMP
Data & Tools: MySQL, JPA, Flyway, Docker Compose, GitHub Actions, Git, Postman, Linux, Maven
Testing: JUnit 5, Mockito, Vitest, React Testing Library, Testcontainers

SELECTED PROJECTS

<u>Restaurant Operations Platform</u>	Completed
<i>React 19, TypeScript, Java 21, Spring Boot, MySQL, Docker</i>	
- Engineered a full-stack platform connecting reservations, table service, orders, kitchen workflow, inventory, purchasing, staff scheduling, payments, invoicing, and operational reporting. - Implemented Spring Security, rotating refresh tokens, transactional business rules, optimistic and pessimistic concurrency control, immutable financial and stock history, and authenticated real-time kitchen updates. - Verified the system with 250 automated frontend, backend, and MySQL integration tests, plus Checkstyle, ESLint, production builds, Flyway validation, Docker, and GitHub Actions CI.	
<u>CoS-BA Bias Auditor</u>	Completed - Final-Year Project - 86%
<i>React, Node.js, Express, MySQL, JWT, Recharts</i>	
- Developed a full-stack platform for uploading AI-generated content, reporting bias, reviewing community submissions, and managing moderation workflows. - Added authentication, file uploads, search and filters, likes and comments, report-status tracking, admin controls, and analytical dashboards.	
<u>Attendance Management System v2</u>	In Development
<i>React, TypeScript, Node.js, Express, MySQL, JWT</i>	
- Building an admin-focused system for student and session management, attendance marking, dashboard analytics, filtering, pagination, notes, profiles, reports, and birthday tracking. - Implementing authenticated REST workflows, MySQL persistence, role-based administration, bulk Excel import and export, attendance statistics, and report exports.	
<u>TraceAI</u>	In Development
<i>TypeScript, Express, Python, FastAPI, MySQL, Docker Compose</i>	
- Designing a human-in-the-loop platform for claim-level verification of AI-generated answers against uploaded evidence documents. - Established the API contract, TypeScript backend, Python AI-service, MySQL schema, authentication, health checks, and Docker Compose foundations.	

SPOKEN LANGUAGES

Arabic: Native | **English:** Professional working proficiency
